A DATA DRIVEN EXPLORATION OF APPLE'S IPHONE IMPACTS IN INDIA

DATA VISUALIZATION

No Of Unique Visualizations:

- iPhone reveals the data collection. …
- iPhone restricts online activities storage. …
- Apple App Store offers secure apps. …
- Malware activities. …
- iPhone shows if the mic or camera is open by any app.

KPI:

- Who else is using scorecards successfully? Apple uses five performance indicators as part of a holistic approach to its long-term performance plan. This includes customer satisfaction, core competencies, employee commitment and alignment (through a comprehensive employee survey), market share and shareholder value
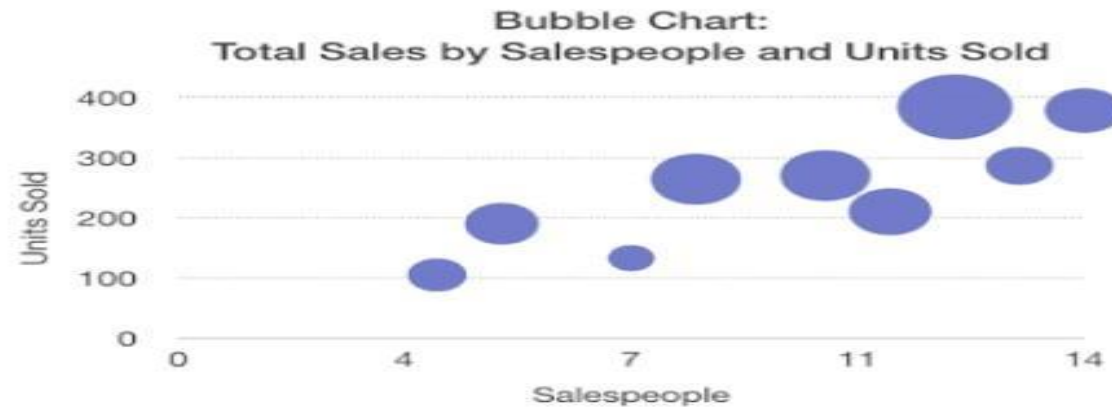

Models:

- The model number is on the upper side — the side with the display. iPhone models that support only eSIM don't have a SIM tray.

Bar Chart Showing Battery – Type:

- To see an overview of your battery level and activity for the last 24 hours and up to the last 10 days, go to Settings > Battery.

- When you tap one of the time periods above the Activity graph (Last 24 Hours or Last [X] Days), you can see which apps contributed to your battery usage during that time period, and the proportion of battery used for the app.

- Background Activity means that most of the app's battery usage – such as playing music or tracking location – happened while the app was running in the background.

- No Mobile Coverage and Low Signal means that your device was searching for a signal or being used with a low signal.
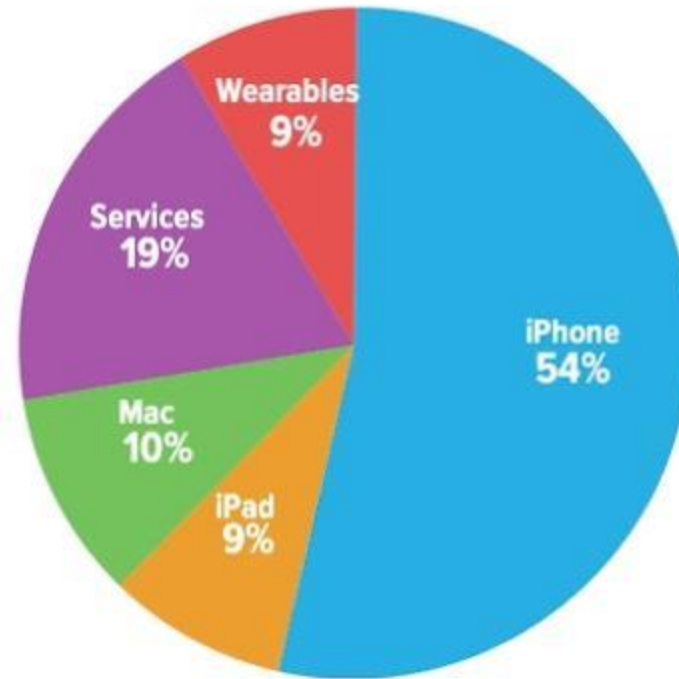

Bubble Chart Showing Model:

Bubble Chart:
Total Sales by Salespeople and Units Sold

| SALESPEOPLE	UNITS SOLD	TOTAL SALES
8	264	£7,010,784
14	378	£5,352,858
